Dear Supervalu Foods Scholarship Committee:

I am applying for the Supervalu Foods Scholarship in order to achieve academic goals and to provide the finances that would enable me to attend a university or college.

My primary academic interests are in the math and biology fields. Another interest is acting, which gives me a chance to create and entertain as a whole different person. I would like to incorporate acting courses in my university program. My hobbies are reading, movies, and cheerleading. Cheerleading has been my favorite sport throughout high school and I have been involved in many events and performances. This has taught me to be a leader and to become an encouraging, helpful person.

I am on the Grad Committee at my high school, which involves working together with many students and making decisions for the grad ceremony, fundraisers, and prom. I also work in the career center as a student helper, where I do photocopying, filing, computer work, advertising, and many other clerical duties. I have gained a lot of experience in this field.

I am wishing to attend a university or college next year in sciences and math. I am applying to UBC, UVIC, and Camosun College. I would like to achieve a degree in math or biology or a combination, since both interest me very much. I am also very passionate about acting and would like the chance to further my overall experience in this field.

I have consistently achieved many Honor and Effort roll awards throughout my high school years, and every year I have achieved at least a 85% average. I won an essay competition in grade eleven concerning Canada's natural resources. In winning this competition, I was selected as a BC delegate to attend the Interchange on Canadian Studies 2005. I had a chance to meet many students from across Canada and see the town of Medicine Hat, Alberta. I have done work experience as a referee and babysitter, and have saved money to go to university. A scholarship would help me financially, as a part time employment is insufficient to cover my academic costs.

Thank you for your time and consideration.

Sincerely,

Taylor McMillan
